С	ommunity Servi	ice Internship/Project(Mandatory) for 6 w	eeks duratio	n durir	ig summ	er vacatio	on

# **Information Technology**

#### Note:

- 1. Eligible and interested students can register either for Honors or for a Minor in IV Semester as per the guidelines issued by the University
- 2. Students shall register for NCC/NSS/NSO activities and will be required to participate in an activity for two hours in a week during fourth semester.
- 3. Lateral entry students shall undergo a bridge course in Mathematics during third semester

Course Code	Deterministic & Stochastic	Statistical Methods	L	Т	Р	C
20A54404	(Common to CSE, IT,CSE (AI), C		3	0	0	3
		SE (AI & WIL) and AI &				
	DS)					
Pre-requisite	Basic MathematicsSemesterIV					
Course Objectives:						
	s a study of various Mathematical Metho					
0	e, Machine Learning, and Data Science	and also for Computer Science	ce and	i eng	ineer	ing
problems.						
Course Outcomes (						
	the course, students will be able to					
	al thinking to problem-solving in context.					
	hods related to these concepts in a variety					
	iate technology to aid problem-solving and n process of inference in probabilistic reas					
	skills in unconstrained optimization.	sonnig system.				
UNIT - I	Data Representation		9 H	rc		
	Projections, Notion of hyper planes, half-p	lanes Principal Component A			nulat	ion
Principal Componen	ts, sample principal coefficients, covarian	ce matrix of data set Dimen	sional	itv re	ducti	on
	nposition, Gram Schmidt process.	ice, matrix of data set, Dimens	sionai	ity it	uucu	on,
UNIT - II	Single Variable Distribution		9 H	rs		
	iscrete and continuous), probability density	v functions, properties, mathen			ectati	on-
Probability distributi	on - Binomial, Poisson approximation to	he binomial distribution and n	orma	l disti	ibuti	on-
	orm distribution-exponential distribution.					
UNIT - III	Stochastic Processes And Markov Cha	ins:	9 H	rs		
Introduction to Stoch	astic processes- Markov process. Transitio	on Probability, Transition Proba	ability	Mat	rix, F	irst
order and Higher or	der Markov process, step transition prob	abilities, Markov chain, Stea	dy sta	ate co	onditi	on,
Markov analysis.						
UNIT - IV	Multivariate Distribution Theory		10 I			
	distribution – Properties, Distributions					
	onal distributions, Partial and Multiple cor					
	RENCE AND ITS APPLICATIONS: Sta					
	ource coding theorem, Joint entropy, Cond	litional entropy, Kullback-Lei			ence.	
UNIT - V	Optimization		9 H		.1	1
	nization, Necessary and sufficiency con					
	ation, KKT conditions, Introduction to non ization view of machine learning. Data Sc

Course Code	DATABASE MANAGEMENT		L	Т	Р	C
20A05401T	(Common to CSE, IT, CSE(DS), CSE CSE (AI & ML) and A		3	0	0	3
Pre-requisite	NIL	Semester			IV	
<u> </u>		Semester	1			
<b>Course Objectives:</b>						
This course i	s designed to:					
• Train in the	fundamental concepts of database management s	ystems, database m	odel	ing a	nd de	esign
SQL, PL/SQ	and system implementation techniques.					
Enable stude	nts to model ER diagrams for any customized appl	ication				
	propriate strategies for optimization of queries.					
	vledge on concurrency techniques					
	the organization of Databases					
Course Outcomes (C						
	he course, students will be able to					
	base for a real-world information system					
	ctions that preserve the integrity of the database					
	es for a database					
	data to prevent redundancy					
	to retrieve the information from the database.	-	0.7.7			
UNIT - I	Introduction, Introduction to Relational Mode as systems applications, Purpose of Database Systems		9H			
Architecture, Data M Introduction to Re	, Database Design, Data Storage and Queryin ining and Information Retrieval, Specialty Databa <b>lational Model:</b> Structure of Relational Databa	ses, Database users a	and A	Admin	nistra	tors,
	Query Languages, Relational Operations		T			
UNIT - II	Introduction to SQL, Advanced SQL		9 H			
	: Overview of the SQL Query Language, SQL I					
	Basic Operations, Set Operations, Null Values, Ag					
	atabase. Intermediate SQL: Joint Expressions, Vi	ews, Transactions, I	ntegi	ity C	onstr	aints
	schemas, Authorization.	ana and Dua as duuna	Tuis	~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~	Deer	
	essing SQL from a Programming Language, Funct	ions and Procedures,	Ing	gers,	Recu	ITSIV
UNIT - III	nal relational query languages. Database Design and the E-R Model, Relationa	Databasa Dasign	8H	Ira		
	d the E-R Model: Overview of the Design Pr				in M	[odo]
	ng Redundant Attributes in Entity Sets, Entity					
	Entity-Relationship Design Issues.	-Kelationship Diag	ams	, גנט	aucin	ли
Relational Database						
	ational Designs, Atomic Domains and First Normal	Form Decompositi	on U	sing	Funct	iona
	tional-Dependency Theory, Algorithms for I					
	ncies, More Normal Forms.		com	000101	011 (	55112
UNIT - IV	Query Processing, Query optimization		8 H	Irs		
	Overview, Measures of Query cost, Selection of	peration, sorting. Ic			tion.	othe
operations, Evaluatio		,		1	,	
	Overview, Transformation of Relational Express	ions, Estimating stat	tistic	s of I	Expre	ssio
	aluation Plans, Materialized views, Advanced Top				I.	
UNIT - V	Transaction Management, Concurrency C		101			
	System					

### **Information Technology**

Transactions: Concept, A Simple Transactional Model, Storage Structures, Transaction Atomicity and Durability, Transaction Isolation, Serializability, Isolation and Atomicity, Transaction Isolation Levels, Implementation of Isolation Levels, Transactions as SQL Statements.

**Concurrency Control:** Lock-based Protocols, Deadlock Handling, Multiple granularity, Timestamp-based Protocols, and Validation-based Protocols.

**Recovery System:** Failure Classification, Storage, Recovery and Atomicity, Recovery Algorithm, Buffer Management, Failure with Loss of Nonvolatile Storage, Early Lock Release and Logical Undo Operations. Textbooks:

1. A.Silberschatz, H.F.Korth, S.Sudarshan, "Database System Concepts",6/e, TMH 2019

#### Reference Books:

1. Database Management System, 6/e RamezElmasri, Shamkant B. Navathe, PEA

2. Database Principles Fundamentals of Design Implementation and Management, Carlos Coronel, Steven Morris, Peter Robb, Cengage Learning.

3. Database Management Systems, 3/e, Raghurama Krishnan, Johannes Gehrke, TMH

<b>Course Code</b>	OPERATING SYSTEMS	L	Т	Р	С	
20A05402T	(Common to CSE, IT, CSE( DS), CSE (IoT), CSE (AI), CSE (AI & ML) and AI & DS)					
Pre-requisite	Basics of CO and DBMS Semester		Γ	V		
<b>^</b>						
<b>Course Objectiv</b>						
	rse is designed to					
	erstand basic concepts and functions of operating systems					
	erstand the processes, threads and scheduling algorithms.					
	ide good insight on various memory management techniques					
<ul> <li>Expose the students with different techniques of handling deadlocks</li> <li>Explore the concept of file-system and its implementation issues</li> </ul>						
<ul> <li>Explore the concept of file-system and its implementation issues</li> <li>Familiarize with the basics of the Linux operating system</li> </ul>						
<ul> <li>Familiarize with the basics of the Linux operating system</li> <li>Implement various schemes for achieving system protection and security</li> </ul>						
Course Outcom		ny				
	of the course, students will be able to					
-	now applications interact with the operating system					
	the functioning of a kernel in an Operating system.					
	ize resource management in operating systems					
	various scheduling algorithms					
•	concurrency mechanism in Operating Systems					
	emory management techniques in the design of operating systems	8				
	and the functionality of the file system	5				
	e and contrast memory management techniques.					
	and deadlock prevention and avoidance.					
	administrative tasks on Linux based systems.					
	Derating Systems Overview, System Structures	8H	rs			
	tems Overview: Introduction, Operating system functions,			svst	ems	
	puting environments, Open-Source Operating Systems	- 1	0	5		
	res: Operating System Services, User and Operating-System Inter	face.	syste	ems c	alls,	
	Calls, system programs, Operating system Design and Implem					
• •	Operating system debugging, System Boot.			•	Ū	
UNIT - II I	Process Concept, Multithreaded Programming, Process	10H	Irs			
	Scheduling, Inter-process Communication					
	pt: Process scheduling, Operations on processes, Inter-proce	ss co	ommu	inicat	ion,	
	in client server systems.					
	Programming: Multithreading models, Thread libraries, Threadin					
	ling: Basic concepts, Scheduling criteria, Scheduling algorithms,	Mult	iple p	proce	ssor	
Ũ	ad scheduling, Examples.

	ng philosophers problem, Readers and writers problem.	Las	4	TIme		
	Aemory-Management Strategies, Virtual Memory Aanagement	Lec	ture 8	HIS		
	gement Strategies: Introduction, Swapping, Contiguous memory	alloc	ration	Pag	ing	
Segmentation, E		anot	auon	, 1 ag	mg,	
	y Management: Introduction, Demand paging, Copy on-write,	Page	e renl	acem	ent	
	, Thrashing, Memory-mapped files, Kernel memory allocation, E			accin	viit,	
	Deadlocks, File Systems		ture 9	)Hrs		
	- www. with a me of a contraction	Lee		1110		

# **Information Technology**

Deadlocks: Resources, Conditions for resource deadlocks, Ostrich algorithm, Dea	dlock detection And				
recovery, Deadlock avoidance, Deadlock prevention.					
File Systems: Files, Directories, File system implementation, management and optimization.					
Secondary-Storage Structure: Overview of disk structure, and attachment, Disk scheduling, RAID					
structure, Stable storage implementation.	0				
UNIT - V System Protection, System Security	Lecture 8Hrs				
System Protection: Goals of protection, Principles and domain of protection, Ac	cess matrix, Access				
control, Revocation of access rights.					
System Security: Introduction, Program threats, System and network threats,	Cryptography as a				
security, User authentication, implementing security defenses, firewalling to p	protect systems and				
networks, Computer security classification.					
Case Studies: Linux, Microsoft Windows.

Course Code	MANAGERIAL ECONOMICS AND FINANCIAL	L	Т	Р	С	
20A52301	52301 ANALYSIS 3 0		0	3		
	(Common to All branches of Engineering)					
Pre-requisite	NIL Semester	1	Ι	Ι		
Course Objective	es:					
To inculc	ate the basic knowledge of micro economics and financial accour	nting				
	the students learn how demand is estimated for different prod		, inp	ut-ou	tput	
relationsh	ip for optimizing production and cost				•	
• To Know the Various types of market structure and pricing methods and strategy						
• To give a	• To give an overview on investment appraisal methods to promote the students to learn how t					
plan long	plan long-term investment decisions.					
<ul> <li>To provid</li> </ul>	• To provide fundamental skills on accounting and to explain the process of preparing financia				cial	
statement	statements					
<b>Course Outcome</b>	s (CO):					
• Define the	e concepts related to Managerial Economics, financial accounting	g and	man	agem	ent.	
<ul> <li>Understar</li> </ul>						
markets						
<ul> <li>Apply the</li> </ul>	e Concept of Production cost and revenues for effective Business	decis	ion			
Analyze ł	now to invest their capital and maximize returns					
• Evaluate	the capital budgeting techniques					
<ul> <li>Develop t</li> </ul>	he accounting statements and evaluate the financial performance	of bu	isine	ss ent	tity.	
UNIT - I	Managerial Economics					
	Demand Elasticity- Types – Measurement. Demand Forecasting- nods. Managerial Economics and Financial Accounting and Mana <b>Production and Cost Analysis</b>					
Introduction – Nature, meaning, significance, functions and advantages. Production Function– Least- cost combination– Short run and Long run Production Function- Isoquants and Isocosts, MRTS - Cobb-Douglas Production Function - Laws of Returns - Internal and External Economies of scale. Cost & Break-Even Analysis - Cost concepts and Cost behavior- Break-Even Analysis (BEA) - Determination of Break-Even Point (Simple Problems)-Managerial significance and limitations of Break-Even Analysis.

<ul><li>b. Insert any fi</li><li>c. Update the o</li><li>d. Rename the</li><li>e. Delete the e</li></ul>	Job Mgr Sal nn commission with doma ve records into the table. column details of job column of Employ table mployee whose empno is thent table with the following Name	Varchar2(20)         Number         Number         ain to the Employee table.         using alter command.         19.         ng structure.         Type         Number         Varchar2(20)				
<ul><li>b. Insert any fi</li><li>c. Update the o</li><li>d. Rename the</li><li>e. Delete the e</li></ul>	Job Mgr Sal nn commission with doma ve records into the table. column details of job column of Employ table mployee whose empno is nent table with the followin Name Deptno	Varchar2(20)         Number         Number         ain to the Employee table.         using alter command.         19.         ng structure.         Type         Number				
<ul><li>b. Insert any fi</li><li>c. Update the o</li><li>d. Rename the</li><li>e. Delete the e</li></ul>	Job Mgr Sal nn commission with doma ve records into the table. column details of job column of Employ table mployee whose empno is nent table with the followin Name Deptno Deptname	Varchar2(20)         Number         Number         ain to the Employee table.         using alter command.         19.         ng structure.         Type         Number         Varchar2(20)				
<ul> <li>b. Insert any fi</li> <li>c. Update the o</li> <li>d. Rename the</li> <li>e. Delete the e</li> </ul> 2. Create departm <ul> <li>a. Add column</li> </ul>	Job Mgr Sal nn commission with doma ve records into the table. column details of job column of Employ table mployee whose empno is nent table with the followin Name Deptno Deptname	Varchar2(20)         Number         Number         ain to the Employee table.         using alter command.         19.         ng structure.         Type         Number         Varchar2(20)         Varchar2(20)				

- d. Update the record where deptno is9.e. Delete any column data from thetable

### **Information Technology**

3. Create a table called Customertable

Name	Туре
Cust name	Varchar2(20)
Cust street	Varchar2(20)
Cust city	Varchar2(20)

- a. Insert records into thetable.
- b. Add salary column to thetable.
- c. Alter the table columndomain.
- d. Drop salary column of the customertable.
- e. Delete the rows of customer table whose ust\_city is 'hyd'.
- f. Create a table called branchtable.

Name	Туре
Branch name	Varchar2(20)
Branch city	Varchar2(20)
asserts	Number

4. Increase the size of data type for asserts to the branch.

- a. Add and drop a column to the branch table.
  - b. Insert values to the table.
  - c. Update the branch name column
  - d. Delete any two columns from the table
- 5. Create a table called sailor table

Name	Туре
Sid	Number
Sname	Varchar2(20)
rating	Varchar2(20)

- a. Add column age to the sailor table.
- b. Insert values into the sailor table.
- c. Delete the row with rating>8.
- d. Update the column details of sailor.
- e. Insert null values into the table.
- 6. Create a table called reserves table

Name	Туре
Boat id	Integer
sid	Integer
day	Integer

- a. Insert values into the reservestable.
- b. Add column time to the reservestable.
- c. Alter the column day data type todate.
- d. Drop the column time in thetable.
- e. Delete the row of the table with somecondition.

3.

# JAWAHARLAL NEHRU TECHNOLOGICAL UNIVERSITY ANANTAPUR (Established by Govt. of A.P., ACT No.30 of 2008) ANANTHAPURAMU – 515 002 (A.P) INDIA

# **Information Technology**

#### Week-2: QUERIES USING DDL AND DML

- 1. a. Create a user and grant all permissions to theuser.
  - b. Insert the any three records in the employee table and use rollback. Check theresult.c. Add primary key constraint and not null constraint to the employeetable.
  - d. Insert null values to the employee table and verify theresult.
- 2. a. Create a user and grant all permissions to theuser.
  - b. Insert values in the department table and usecommit.
    - c. Add constraints like unique and not null to the departmenttable.
  - d. Insert repeated values and null values into thetable.
  - a. Create a user and grant all permissions to theuser.
  - b. Insert values into the table and use commit.
  - c. Delete any three records in the department table and use rollback.
  - d. Add constraint primary key and foreign key to thetable.
- 4. a. Create a user and grant all permissions to theuser.
  - b. Insert records in the sailor table and usecommit.
  - c. Add save point after insertion of records and verify save point.
  - d. Add constraints not null and primary key to the sailortable.
- 5. a. Create a user and grant all permissions to theuser.
  - b. Use revoke command to remove userpermissions.
    - c. Change password of the usercreated.
  - d. Add constraint foreign key and notnull.
- 6. a. Create a user and grant all permissions to theuser.
  - b. Update the table reserves and use savepointandrollback.
    - **c.** Add constraint primary key, foreign key and not null to the reserves table
  - d. Delete constraint not null to the tablecolumn

#### Week-3:QUERIES USING AGGREGATE FUNCTIONS

- 1. a. By using the group by clause, display the enames who belongs to deptno 10 alongwithaveragesalary.
  - b. Display lowest paid employee details under eachdepartment.
  - c. Display number of employees working in each department and their departmentnumber.

d. Using built in functions, display number of employees working in each department and their department name from dept table. Insert deptname to dept table and insert deptname for each row, do the required thing specified above.

- e. List all employees which start with either B or C.
- f. Display only these ename of employees where the maximum salary is greater than or equal to 5000.
- 2. a. Calculate the average salary for each differentjob.
  - b. Show the average salary of each job excludingmanager.
  - c. Show the average salary for all departments employing more than threepeople.
  - d. Display employees who earn more than the lowest salary in department 30
  - e. Show that value returned by sign (n)function.
  - f. How many days between day of birth to currentdate
- 3. a. Show that two substring as singlestring.
  - b. List all employee names, salary and 15% rise insalary.
  - c. Display lowest paid emp details under eachmanager
  - d. Display the average monthly salary bill for eachdeptno.
  - e. Show the average salary for all departments employing more than twopeople.
  - f. By using the group by clause, display the eid who belongs to deptno 05 along

## **Information Technology**

withaverage salary.

- 4. a. Count the number of employees in department20
  - b. Find the minimum salary earned byclerk.
  - c. Find minimum, maximum, average salary of allemployees.
  - d. List the minimum and maximum salaries for each jobtype.
  - e. List the employee names in descendingorder.
  - f. List the employee id, names in ascending order byempid.
- 5. a. Find the sids ,names of sailors who have reserved all boats called "INTERLAKE Find the age of youngest sailor who is eligible to vote for each rating level with at least two such sailors.
  - b. Find the sname , bid and reservation date for eachreservation.
  - c. Find the ages of sailors whose name begin and end with B and has at least 3characters.
  - d. List in alphabetic order all sailors who have reserved redboat.
  - e. Find the age of youngest sailor for each ratinglevel.
- 6. a. List the Vendors who have delivered products within 6 months from orderdate.
  - b. Display the Vendor details who have supplied both Assembled and Subparts.
  - c. Display the Sub parts by grouping the Vendor type (Local or NonLocal).
  - d. Display the Vendor details in ascendingorder.
  - e. Display the Sub part which costs more than any of the Assembledparts.
  - f. Display the second maximum cost Assembledpart

#### Week-4: PROGRAMS ON PL/SQL

- 1. a. Write a PL/SQL program to swaptwonumbers.
  - b. Write a PL/SQL program to find the largest of threenumbers.
- 2. a. Write a PL/SQL program to find the total and average of 6 subjects and display thegrade.
- b. Write a PL/SQL program to find the sum of digits in a givennumber.
- 3. a. Write a PL/SQL program to display the number in reverseorder.
- b. Writea PL/SQLprogramtocheckwhetherthegivennumberisprimeornot.
- 4. a. Write a PL/SQL program to find the factorial of a givennumber.
  - b. Write a PL/SQL code block to calculate the area of a circle for a value of radius varying from 3 to 7. Store the radius and the corresponding values of calculated area in an empty table named areas, consisting of two columns radius andarea.
- a. Write a PL/SQL program to accept a string and remove the vowels from the string. (When 'hello' passed to the program it should display 'Hll' removing e and o from the worldHello).
   b. Write a PL/SQL program to accept a number and a divisor. Make sure the divisor is less than
  - or equal to 10. Else display an error message. Otherwise Display the remainderin words.

### Week-5: PROCEDURES AND FUNCTIONS

- 1. Write a function to accept employee number as parameter and return Basic +HRA together as single column.
- 2. Accept year as parameter and write a Function to return the total net salary spent for a givenyear.
- 3. Create a function to find the factorial of a given number and hence findNCR.
- 4. Write a PL/SQL block o pint prime Fibonacci series using localfunctions.
- 5. Create a procedure to find the lucky number of a given birthdate.
- 6. Create function to the reverse of givennumber

#### Week-6: TRIGGERS

1. Create a row level trigger for the customers table that would fire for INSERT or UPDATE or

### **Information Technology**

DELETE operations performed on the CUSTOMERS table. This trigger will display the salary difference between the old values and newvalues:

CUSTOMERS table:

ID	NAME	AGE	ADDRESS	SALARY
1	Alive	24	Khammam	2000
2	Bob	27	Kadappa	3000
3	Catri	25	Guntur	4000
4	Dena	28	Hyderabad	5000
5	Eeshwar	27	Kurnool	6000
6	Farooq	28	Nellore	7000

2. Creation of insert trigger, delete trigger, update trigger practice triggers using the passenger database.

Passenger( Passport\_ id INTEGER PRIMARY KEY, Name VARCHAR (50) NotNULL, Age Integer Not NULL, Sex Char, Address VARCHAR (50) NotNULL);

- a. Write a Insert Trigger to check the Passport\_id is exactly six digits ornot.
- b. Write a trigger on passenger to display messages '1 Record is inserted', '1 record is deleted', '1 record is updated' when insertion, deletion and updation are done on passengerrespectively.
- 3. Insert row in employee table using Triggers. Every trigger is created with name any trigger have same name must be replaced by new name. These triggers can raised before insert, update or delete rows on data base. The main difference between a trigger and a stored procedure is that the former is attached to a table and is only fired when an INSERT, UPDATE or DELETEoccurs.
- 4. Convert employee name into uppercase whenever an employee record is inserted or updated. Trigger to fire before the insert orupdate.
- 5. Trigger before deleting a record from emp table. Trigger will insert the row to be deleted into table called delete \_emp and also record user who has deleted the record and date and time ofdelete.
- 6. Create a transparent audit system for a table CUST\_MSTR. The system must keep track of the records that are being deleted orupdated

### Week-7:PROCEDURES

- 1. Create the procedure for palindrome of givennumber.
- 2. Create the procedure for GCD: Program should load two registers with two Numbers and then apply the logic for GCD of two numbers. GCD of two numbers is performed by dividing the greater number by the smaller number till the remainder is zero. If it is zero, the divisor is the GCD if not the remainder and the divisors of the previous division are the new set of two numbers. The process is repeated by dividing greater of the two numbers by the smaller number till the remainder and GCD is found.
- 3. Write the PL/SQL programs to create the procedure for factorial of givennumber.
- 4. Write the PL/SQL programs to create the procedure to find sum of N naturalnumber.
- 5. Write the PL/SQL programs to create the procedure to find Fibonacciseries.
- 6. Write the PL/SQL programs to create the procedure to check the given number is perfect ornot

#### Week-8: CURSORS

# **Information Technology**

- 1. Write a PL/SQL block that will display the name, dept no, salary of fist highest paidemployees.
- 2. Update the balance stock in the item master table each time a transaction takes place in the item transaction table. The change in item master table depends on the item id is already present in the item master then update operation is performed to decrease the balance stock by the quantity specified in the item transaction in case the item id is not present in the item master table then the record is inserted in the item mastertable.
- 3. Write a PL/SQL block that will display the employee details along with salary usingcursors.
- 4. To write a Cursor to display the list of employees who are working as a Managersor Analyst.
- 5. To write a Cursor to find employee with given job anddeptno.
- 6. Write a PL/SQL block using implicit cursor that will display message, the salaries of all the employees in the 'employee' table are updated. If none of the employee's salary are updated we getamessage 'None of the salaries were updated'. Else we get a message like for example, 'Salaries for 1000 employees are updated' if there are 1000 rows in 'employee' table

#### Week-9: CASE STUDY: BOOK PUBLISHING COMPANY

A publishing company produces scientific books on various subjects. The books are written by authors who specialize in one particular subject. The company employs editors who, not necessarily being specialists in a particular area, each take sole responsibility for editing one or more publications.

A publication covers essentially one of the specialist subjects and is normally written by a single author. When writing a particular book, each author works with on editor, but may submit another work for publication to be supervised by other editors. To improve their competitiveness, the company tries to employ a variety of authors, more than one author being a specialist in a particular subject for the above case study, do thefollowing:

- 1. Analyze the datarequired.
- 2. Normalize theattributes.

Create the logical data model using E-R diagrams

### Week-10: CASE STUDY GENERAL HOSPITAL

AGeneralHospitalconsistsofanumberofspecializedwards(suchasMaternity,Pediatric,Oncology, etc.). Each ward hosts a number of patients, who were admitted on the recommendation of their ownGP and confirmed by a consultant employed by the Hospital. On admission, the personal details of every patient are recorded. A separate register is to be held to store the information of the tests undertaken and the results of a prescribed treatment. A number of tests may be conducted for each patient. Each patient is assigned to one leading consultant but may be examined by another doctor, if required. Doctors are specialists in some branch of medicine and may be leading consultants for a number of patients, not necessarily from the same ward. For the above case study, do the following.

- 1. Analyze the datarequired.
- 2. Normalize theattributes.

Create the logical data model using E-R diagrams

### Week-11: CASE STUDY: CAR RENTAL COMPANY

A database is to be designed for a car rental company. The information required includes a description of cars, subcontractors (i.e. garages), company expenditures, company revenues and customers. Cars are to be described by such data as: make, model, year of production, engine size, fuel type, number of passengers, registration number, purchase price, purchase date, rent price and insurance details. It is the company policy not to keep any car for a period exceeding one year. All

#### **Information Technology**

major repairs and maintenance are done by subcontractors (i.e. franchised garages), with whom CRC has long-term agreements. Therefore the data about garages to be kept in the database includes garage names, addresses, range of services and the like. Some garages require payments immediately after a repair has been made; with others CRC has made arrangements for credit facilities. Company expenditures are to be registered for all outgoings connected with purchases, repairs, maintenance, insurance etc. Similarly the cash inflow coming from all sources: Car hire, car sales, insurance claims must be kept of file. CRC maintains a reasonably stable client base. For this privileged category of customers special creditcard facilities are provided. These customers may also book in advance a particular car. These reservations can be made for any period of time up to one month. Casual customers must pay a deposit for an estimated time of rental, unless they wish to pay by credit card. All major credit cards are accepted. Personal details such as name, address, telephone number, driving license, number about each customer are kept in the database. For the above case study, do thefollowing:

- 1. Analyze the datarequired.
- 2. Normalize theattributes.

Create the logical data model using E-R diagrams

#### Week-12: CASE STUDY: STUDENT PROGRESS MONITORING SYSTEM

A database is to be designed for a college to monitor students' progress throughout their course of study. The students are reading for a degree (such as BA, BA (Hons.) M.Sc., etc) within the framework of the modular system. The college provides a number of modules, each being characterized by its code, title, credit value, module leader, teaching staff and the department they come from. A module is coordinated by a module leader who shares teaching duties with one or more lecturers. A lecturer may teach (and be a module leader for) more than one module. Students are free to choose any module they wish but the following rules must be observed: Some modules require pre- requisites modules and some degree programs have compulsory modules. The database contain about is also to some information studentsincludingtheirnumbers, names, addresses, degrees they read for, and their pastperformance i.e. modules taken and examination results. For the above case study, do the following:

- 1. Analyze the datarequired.
- 2. Normalize theattributes.
- 3. Create the logical data model i.e., ERdiagrams.
- 4. Comprehend the data given in the case study by creating respective tables with primary keys and foreign keys whereverrequired.
- 5. Insert values into the tables created (Be vigilant about Master- Slavetables).
- 6. Display the Students who have taken M.Sccourse
- 7. Display the Module code and Number of Modules taught by eachLecturer.
- 8. Retrieve the Lecturer names who are not Module Leaders.
- 9. Display the Department name which offers 'English 'module.
- 10. Retrieve the Prerequisite Courses offered by every Department (with Departmentnames).
- 11. Present the Lecturer ID and Name who teaches' Mathematics'.
- 12. Discover the number of years a Module istaught.
- 13. List out all the Faculties who work for 'Statistics'Department.
- 14. List out the number of Modules taught by each ModuleLeader.
- 15. List out the number of Modules taught by a particularLecturer.
- 16. Create a view which contains the fields of both Department and Module tables. (Hint- The fields like Module code, title, credit, Department code and itsname).
- 17. Update the credits of all the prerequisite courses to 5. Delete the Module 'History' from the Moduletable.

#### Case Study-3: Tic Tac Toe Game

The Tic Tac Toe Game is based on a two-player game. Each player chooses between X and O. Player play one move at a time simultaneously. In a move, a player can choose any position from a  $3\times3$  grid. The goal here is to get three consecutive X or O in a horizontal, vertical, or diagonal direction. There will be a single activity in this application. This activity will show a  $3\times3$  grid. The status of the game will be displayed at the bottom

### Case Study-4:Video Calling Android App

Video Calling becomes a most demanding feature in many social media apps like WhatsApp, Instagram, Facebook, etc. Not only this but also there are some other applications available for providing only this feature to connect people all over the world with each other like Duo. Hence, this gives an idea to us about the importance of video calling.

### **Information Technology**

#### Case Study-5: Face Detection Android App

Firebase ML KIT aims to make machine learning more accessible, by providing a range of pre-trained models that can use in the iOS and Android apps. Let's use ML Kit's Face Detection API which will identify faces in photos.Design an app that can identify faces in an image, and then display information about these faces, such as whether the person is smiling, or has their eyes closed with wonderful GUI. ### COMMUNITY SERVICE PROJECT .....Experiential learning through community engagement

#### Introduction

- Community Service Project is an experiential learning strategy that integrates meaningful community service with instruction, participation, learning and community development
- Community Service Project involves students in community development and service activities and applies the experience to personal and academic development.
- Community Service Project is meant to link the community with the college for mutual benefit. The community will be benefited with the focused contribution of the college students for the village/ local development. The college finds an opportunity to develop social sensibility and responsibility among students and also emerge as a socially responsible institution.

### Objective

Community Service Project should be an integral part of the curriculum, as an alternative to the 2 months of Summer Internships / Apprenticeships / On the Job Training, whenever there is an exigency when students cannot pursue their summer internships. The specific objectives are;

- To sensitize the students to the living conditions of the people who are around them,
- To help students to realize the stark realities of the society.
- To bring about an attitudinal change in the students and help them to develop societal consciousness, sensibility, responsibility and accountability
- To make students aware of their inner strength and help them to find new /out of box solutions to the social problems.
- To make students socially responsible citizens who are sensitive to the needs of the disadvantaged sections.
- To help students to initiate developmental activities in the community in coordination with public and government authorities.
- To develop a holistic life perspective among the students by making them study culture, traditions, habits, lifestyles, resource utilization, wastages and its management, social problems, public administration system and the roles and responsibilities of different persons across different social systems.

### **Implementation of Community Service Project**

- Every student should put in a 6 weeks for the Community Service Project during the summer vacation.
- Each class/section should be assigned with a mentor.
- Specific Departments could concentrate on their major areas of concern. For example, Dept. of Computer Science can take up activities related to Computer Literacy to different sections of people like youth, women, house-wives, etc
- A log book has to be maintained by each of the student, where the activities undertaken/involved to be recorded.
- The logbook has to be countersigned by the concerned mentor/faculty incharge.

# **Information Technology**

- Evaluation to be done based on the active participation of the student and grade could be awarded by the mentor/faculty member.
- The final evaluation to be reflected in the grade memo of the student.
- The Community Service Project should be different from the regular programmes of NSS/NCC/Green Corps/Red Ribbon Club, etc.
- Minor project report should be submitted by each student. An internal Viva shall also be conducted by a committee constituted by the principal of the college.
- Award of marks shall be made as per the guidelines of Internship/apprentice/ on the job training

#### Procedure

- A group of students or even a single student could be assigned for a particular habitation or village or municipal ward, as far as possible, in the near vicinity of their place of stay, so as to enable them to commute from their residence and return back by evening or so.
- The Community Service Project is a twofold one -
  - First, the student/s could conduct a survey of the habitation, if necessary, in terms of their own domain or subject area. Or it can even be a general survey, incorporating all the different areas. A common survey format could be designed. This should not be viewed as a duplication of work by the Village or Ward volunteers, rather, it could be another primary source of data.
  - Secondly, the student/s could take up a social activity, concerning their domain or subject area. The different areas, could be like
    - Agriculture
    - Health
    - Marketing and Cooperation
    - Animal Husbandry
    - Horticulture
    - Fisheries
    - Sericulture
    - Revenue and Survey
    - Natural Disaster Management
    - Irrigation
    - Law & Order
    - Excise and Prohibition
    - Mines and Geology
    - Energy
    - Internet
    - Free Electricity
    - Drinking Water

#### **EXPECTED OUTCOMES**

## **Information Technology**

#### **BENEFITS OF COMMUNITY SERVICE PROJECT TO STUDENTS**

#### **Learning Outcomes**

- Positive impact on students' academic learning
- Improves students' ability to apply what they have learned in "the real world"
- Positive impact on academic outcomes such as demonstrated complexity of understanding, problem analysis, problem-solving, critical thinking, and cognitive development
- Improved ability to understand complexity and ambiguity

#### **Personal Outcomes**

- Greater sense of personal efficacy, personal identity, spiritual growth, and moral development
- Greater interpersonal development, particularly the ability to work well with others, and build leadership and communication skills

#### **Social Outcomes**

- Reduced stereotypes and greater inter-cultural understanding
- Improved social responsibility and citizenship skills
- Greater involvement in community service after graduation

#### **Career Development**

- Connections with professionals and community members for learning and career opportunities
- Greater academic learning, leadership skills, and personal efficacy can lead to greater opportunity

#### **Relationship with the Institution**

- Stronger relationships with faculty
- Greater satisfaction with college
- Improved graduation rates

#### **BENEFITS OF COMMUNITY SERVICE PROJECT TO FACULTY MEMBERS**

- Satisfaction with the quality of student learning
- New avenues for research and publication via new relationships between faculty and community
- Providing networking opportunities with engaged faculty in other disciplines or institutions
- A stronger commitment to one's research

#### BENEFITS OF COMMUNITY SERVICE PROJECT TO COLLEGES AND UNIVERSITIES

- Improved institutional commitment
- Improved student retention
- Enhanced community relations

#### BENEFITS OF COMMUNITY SERVICE PROJECT TO COMMUNITY

- Satisfaction with student participation
- Valuable human resources needed to achieve community goals
- New energy, enthusiasm and perspectives applied to community work
- Enhanced community-university relations.

**Information Technology** 

#### SUGGESTIVE LIST OF PROGRAMMES UNDER COMMUNITY SERVICE PROJECT

The following the recommended list of projects for Engineering students. The lists are not exhaustive and open for additions, deletions and modifications. Colleges are expected to focus on specific local issues for this kind of projects. The students are expected to carry out these projects with involvement, commitment, responsibility and accountability. The mentors of a group of students should take the responsibility of motivating, facilitating, and guiding the students. They have to interact with local leadership and people and appraise the objectives and benefits of this kind of projects. The project reports shall be placed in the college website for reference. Systematic, Factual, methodical and honest reporting shall be ensured.

#### **For Engineering Students**

- 1. Water facilities and drinking water availability
- 2. Health and hygiene
- 3. Stress levels and coping mechanisms
- 4. Health intervention programmes
- 5. Horticulture
- 6. Herbal plants
- 7. Botanical survey
- 8. Zoological survey
- 9. Marine products
- 10. Aqua culture
- 11. Inland fisheries
- 12. Animals and species
- 13. Nutrition
- 14. Traditional health care methods
- 15. Food habits
- 16. Air pollution
- 17. Water pollution
- 18. Plantation
- **19. Soil protection**
- 20. Renewable energy
- 21. Plant diseases
- 22. Yoga awareness and practice
- 23. Health care awareness programmes and their impact
- 24. Use of chemicals on fruits and vegetables
- 25. Organic farming
- 26. Crop rotation
- 27. Floury culture
- 28. Access to safe drinking water
- 29. Geographical survey

## **Information Technology**

- **30.** Geological survey
- 31. Sericulture
- 32. Study of species
- **33. Food adulteration**
- 34. Incidence of Diabetes and other chronic diseases
- 35. Human genetics
- 36. Blood groups and blood levels
- **37. Internet Usage in Villages**
- 38. Android Phone usage by different people
- 39. Utilisation of free electricity to farmers and related issues
- 40. Gender ration in schooling lvel- observation.

Complimenting the community service project the students may be involved to take up some awareness campaigns on social issues/special groups. The suggested list of programmes are;

#### **Programmes for School Children**

- 1. Reading Skill Programme (Reading Competition)
- 2. Preparation of Study Materials for the next class.
- 3. Personality / Leadership Development
- 4. Career Guidance for X class students
- 5. Screening Documentary and other educational films
- 6. Awareness Programme on Good Touch and Bad Touch (Sexual abuse)
- 7. Awareness Programme on Socially relevant themes.

#### Programmes for Women Empowerment

- 1. Government Guidelines and Policy Guidelines
- 2. Womens' Rights
- 3. Domestic Violence
- 4. Prevention and Control of Cancer
- 5. Promotion of Social Entrepreneurship

#### **General Camps**

- 1. General Medical camps
- 2. Eye Camps
- 3. Dental Camps
- 4. Importance of protected drinking water
- 5. ODF awareness camp
- 6. Swatch Bharath
- 7. AIDS awareness camp
- 8. Anti Plastic Awareness
- 9. Programmes on Environment
- 10. Health and Hygiene
- 11. Hand wash programmes
- 12. Commemoration and Celebration of important days

# **Information Technology**

### **Programmes for Youth Empowerment**

- 1. Leadership
- 2. Anti-alcoholism and Drug addiction
- 3. Anti-tobacco
- 4. Awareness on Competitive Examinations
- 5. Personality Development

#### Common Programmes

- 1. Awareness on RTI
- 2. Health intervention programmes
- 3. Yoga
- 4. Tree plantation
- 5. Programmes in consonance with the Govt. Departments like
  - i. Agriculture
  - ii. Health
  - iii. Marketing and Cooperation
  - iv. Animal Husbandry
  - v. Horticulture
  - vi. Fisheries
  - vii. Sericulture
  - viii. Revenue and Survey
    - ix. Natural Disaster Management
    - x. Irrigation
  - xi. Law & Order
  - xii. Excise and Prohibition
  - xiii. Mines and Geology
  - xiv. Energy

#### **Role of Students:**

- Students may not have the expertise to conduct all the programmes on their own. The students then can play a facilitator role.
- For conducting special camps like Health related, they will be coordinating with the Governmental agencies.
- As and when required the College faculty themselves act as Resource Persons.
- Students can work in close association with Non-Governmental Organizations like Lions Club, Rotary Club, etc or with any NGO actively working in that habitation.
- And also with the Governmental Departments. If the programme is rolled out, the District Administration could be roped in for the successful deployment of the programme.
- An in-house training and induction programme could be arranged for the faculty and participating students, to expose them to the methodology of Service Learning.

### **Timeline for the Community Service Project Activity**

**Duration: 8 weeks** 

## **Information Technology**

### 1. Preliminary Survey (One Week)

- A preliminary survey including the socio-economic conditions of the allotted habitation to be conducted.
- A survey form based on the type of habitation to be prepared before visiting the habitation with the help of social sciences faculty. (However, a template could be designed for different habitations, rural/urban.
- The Governmental agencies, like revenue administration, corporation and municipal authorities and village secreteriats could be aligned for the survey.

### 2. Community Awareness Campaigns (One Week)

• Based on the survey and the specific requirements of the habitation, different awareness campaigns and programmes to be conducted, spread over two weeks of time. The list of activities suggested could be taken into consideration.

### 3. Community Immersion Programme (Three Weeks)

Along with the Community Awareness Programmes, the student batch can also work with any one of the below listed governmental agencies and work in tandem with them. This community involvement programme will involve the students in exposing themselves to the experiential learning about the community and its dynamics. Programmes could be in consonance with the Govt. Departments.

### 4. Community Exit Report (One Week)

• During the last week of the Community Service Project, a detailed report of the outcome of the 8 weeks work to be drafted and a copy shall be submitted to the local administration. This report will be a basis for the next batch of students visiting that particular habitation. The same report submitted to the teacher-mentor will be evaluated by the mentor and suitable marks are awarded for onward submission to the University.

Throughout the Community Service Project, a daily log-book need to be maintained by the students batch, which should be countersigned by the governmental agency representative and the teacher-mentor, who is required to periodically visit the students and guide them.
